02	ESR, HB%	28	Hbs-Ag
03	BT, CT	29	VDRL
04	HB%	30	TPHA
05	TEC	31	HIV (ICT)
06	CBC	32	HCV (ICT)
07	Platelet Count	33	Pregnancy Test
Immunological Test		Clinical Pathology	
08	Blood Grouping and RHF	34	Urine RE & ME
Biochemical Test		35	Stool RE & ME
09	Blood Glucose	Special Cervical Screening	
10	OGTT	36	VIA, Colposcopy
11	S. Bilirubin	Ultrasonogram (USG)	
12	S. Creatinine	37	Whole Abdomen (W/A)
13	SGPT (ALT)	38	Lower Abdomen (L/A)
14	Total Cholesterol	39	Pelvic Organ
15	S. Uric Acid	40	HBS
16	Lipid Profile	41	KUB
17	PPBS	42	Pregnancy profile
18	2HBS	Immunology	
19	Triglycerides	43	TSH, T3, T4, FT3, FT4, FSH, HCG
20	HDL Cholesterol	44	Prolactin, Progesterone, Testosterone
21	FBS (Fasting Blood Sugar)	45	AHM, TPSA, FPSA, AFP,
22	S. Calcium	46	CA-15.3, CA-19.9, CA-125, B2
Sero- Immulogical Test		47	Total Ige, Ferritine, Vitamin-D, VK-MB
23	Widal Test	48	Troponin-I, NT-PRO BNP, D-DIMER, Prolactonin
24	Weil Felix	49	HBS AG, Anti HCV, HIV and more than 100 Parameters
25	ASO Triter		

Progress of RBHC

From the very beginning RBHC is giving the services of physiotherapy (Figure 16), primary healthcare and medicine (Figure 17). Diagnostic service started from September 2023 (Figure 18) and Ultrasonogram service started from December 2023 (Figure 17). EPI program starts on January 2024 (Figure 19).

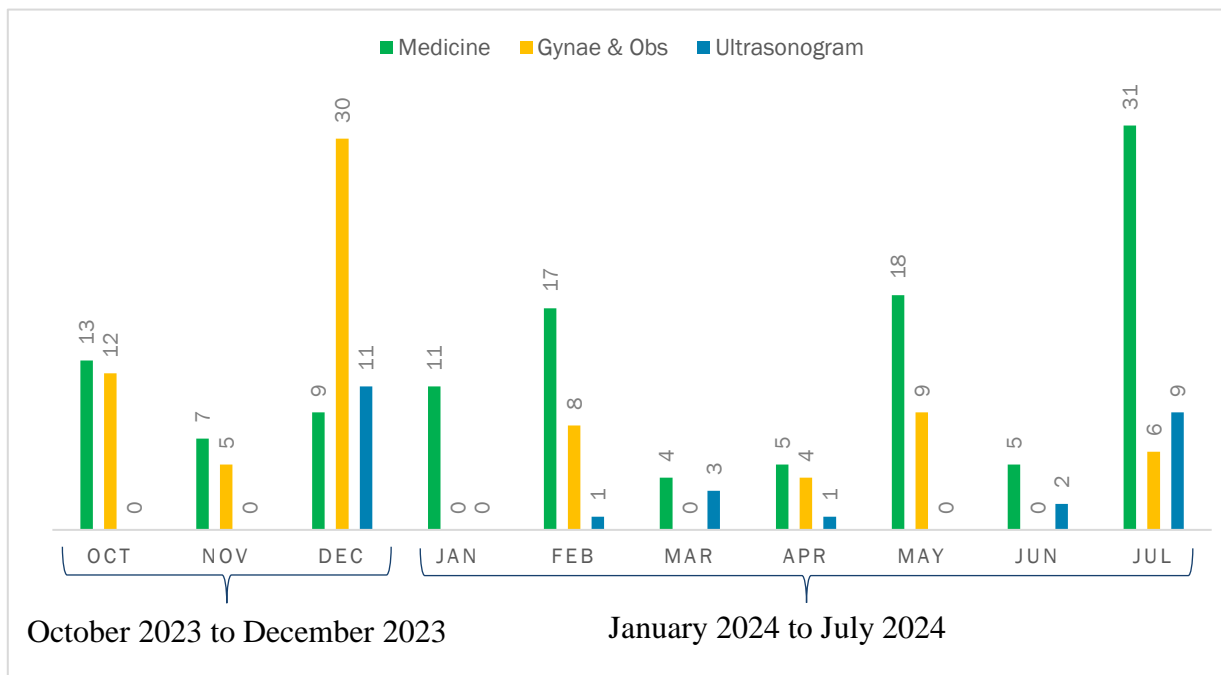

Figure 17: Medicine, Gynecology & Obs. And Ultrasonogram Patients Flow October 2023 to July 2024.

Progress of RBHC

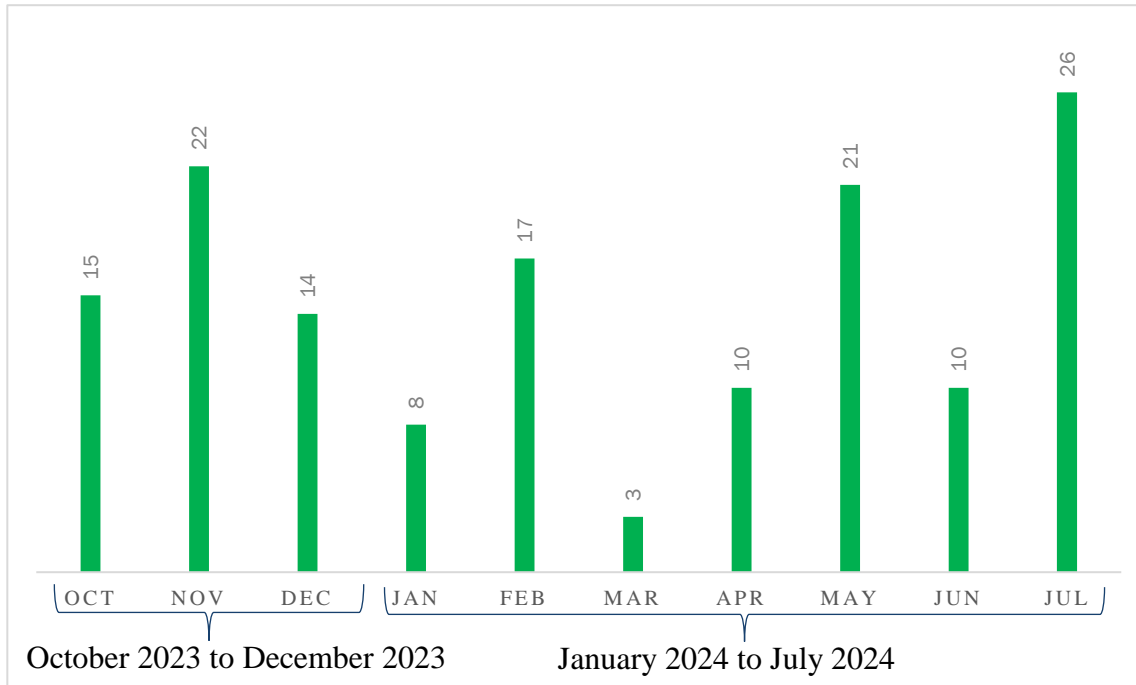

Figure 18: Diagnostic Patients Flow October 2023 to July 2024.

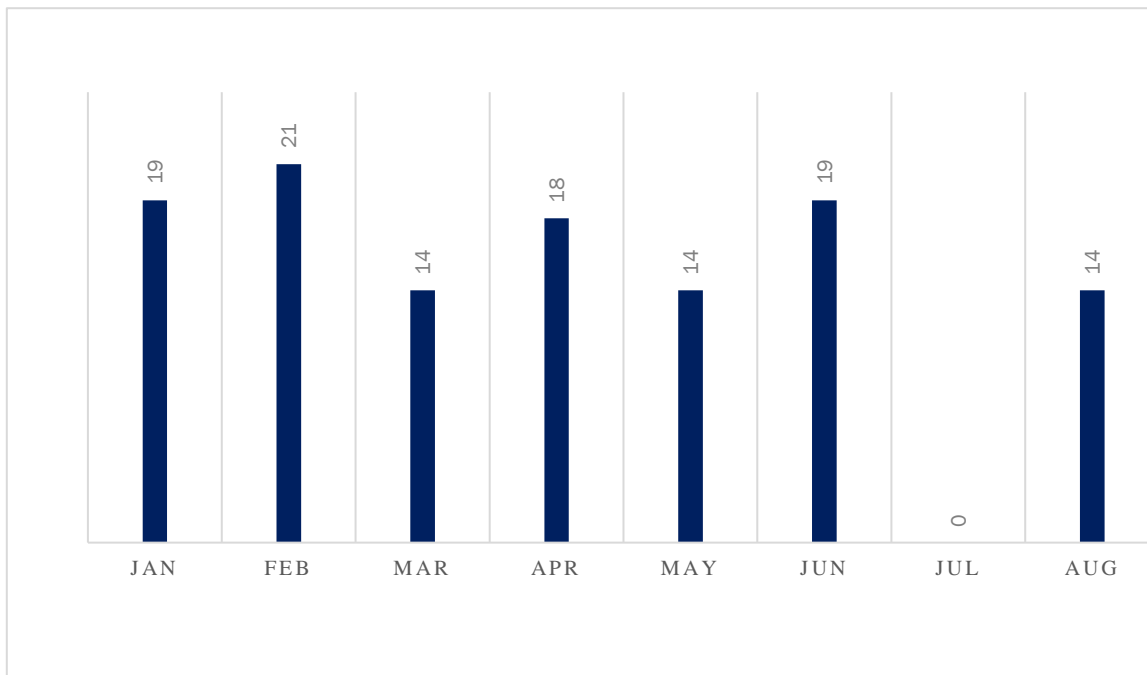

Figure 19: EPI Vaccination Flow January to August 2024.

Progress of RBHC

Beginning in September 2023, 222 women took the cervical cancer screening exam (VIA), and 5 of them subsequently advised to go for further treatment at nearby government hospital and received treatment as well as follow up is running (Figure 20). Several free medical campaigns also increase the patient flow (Figure 21).

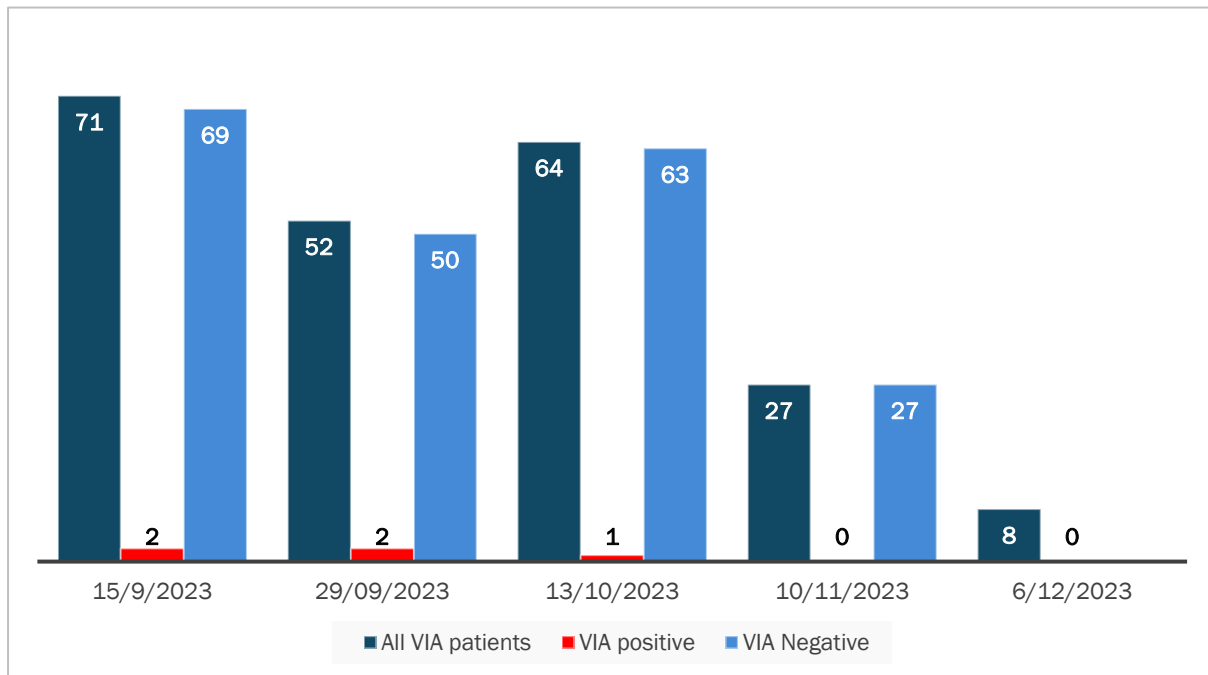

Figure 20: Cervical Screening Test (VIA) Flow September to December 2023.

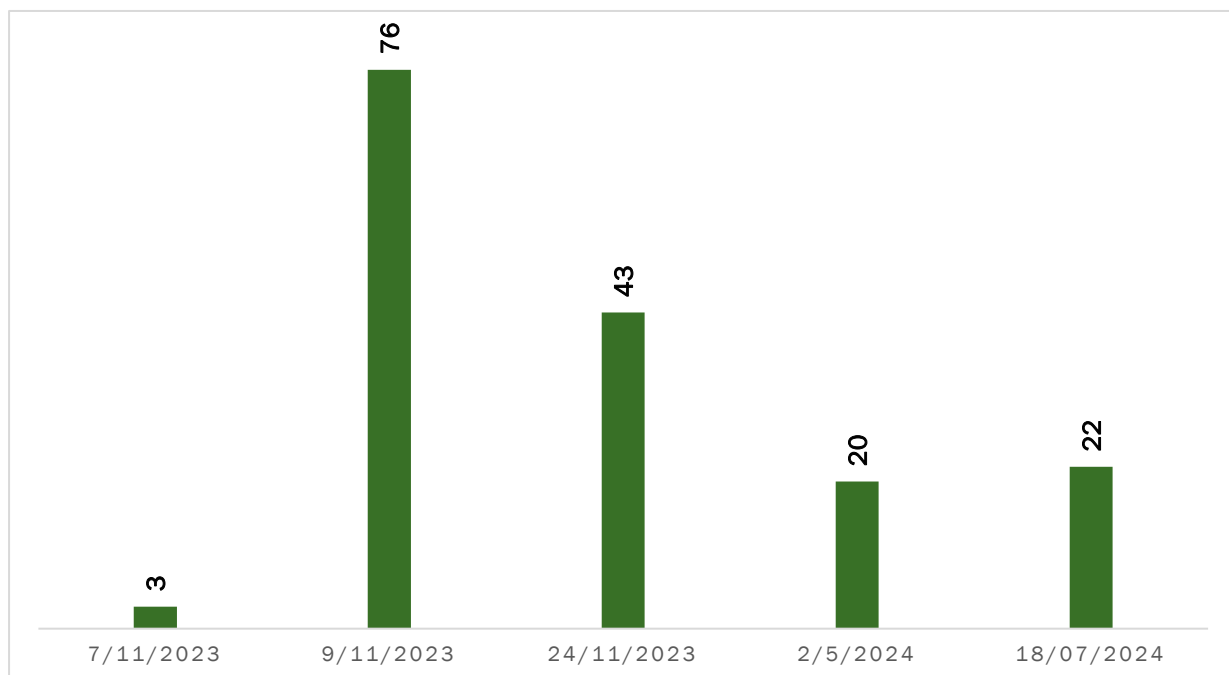

Figure 21: Patients Flow November 2023 to July 2024 After Free Medical Campaign.
